

## **Admission for “BTech in IT” program at IIITD for 2009 – Initial Announcement**

The Indraprastha Institute of Information Technology Delhi (IIITD) is an autonomous Institution with a State University status, created by an Act of Delhi Government (The IIIT Delhi Act, 2007). The mission of IIIT Delhi is to be a global centre of excellence in Information Technology education, training and research. IIITD looks forward to admitting in 2009 a limited number of committed and hard working students in its “B.Tech. in IT” program. (Please read and reflect upon the small note “Is IT for you?” posted on the site).

**This is an initial announcement to inform the prospective students. Information in this may change.**

- Applications for admission will open end of May/early June, after CBSE results are out (and AIEEE and JEE results are also out). The application will be open for only about a week. So prospective applicants are advised to be ready from before. The brochure will also be available in April/May from this site only. Students can download it free of cost.
- ***Eligibility criteria for appearing in IIITD entrance test.*** To appear in the entrance test of IIITD the total PCM marks in Class XII board should be greater than or equal to 80%. (Those who have appeared in some board whose results are not out by the last date of filling the form can apply if their AIEEE rank is less than or equal to 10000.) There will be a 10% relaxation for SC/ST candidates. Further details will be available later.
- For applying, an applicant will be required to enter the information online (including bank draft number), print the form, attach a draft, and then mail it. So, have a bank draft ready (for Rs 500, payable to “IIIT Delhi”) before filling the form online, and ensure that you have a printer available. This will be the only way to apply (i.e. there will not be any forms available from any bank/office/etc.)
- The entrance test is likely to be held in June and counseling is likely to be held in July. It will be an aptitude test, which will test comprehension, quantitative thinking, and logical thinking. Consequently, there is no defined syllabus for the test.

More about admission will be available through this site only from time to time. ***The details and dates may change.*** Interested students are advised to visit the site regularly for latest information.
