# About the Programs

The Institute offers admission to seven B.Tech. programs: Computer Science and Engineering (CSE), Electronics and Communications Engineering (ECE), Computer Science and Applied Mathematics (CSAM), Computer Science and Design (CSD), Computer Science and Social Sciences (CSSS), Computer Science and Biosciences (CSB) and Computer Science and Artificial Intelligence (CSAI).

The B.Tech. program in CSAI, started in the year 2019. This program provides students an opportunity to learn both foundational and experimental components of Artificial Intelligence (AI) and Machine Learning (ML). A student completing this program will be able to undertake industry careers involving innovation and problem-solving using AI and ML technologies and research careers in AI, ML, and, in general, Computer Science areas. More information about the program is available on the Institute website.

Since the current technological era is rich with opportunities for systems integration of technologies from various disciplines to serve the larger goals of society, IIIT-Delhi aspires to provide an environment for interdisciplinary teaching, research, and learning. Our curriculum is flexible and allows students to enroll for elective courses in the 3rd and 4th years from different disciplines like Computer Science, Design, Electronics and Communications, Entrepreneurship, Biosciences and Artificial Intelligence. The curriculum of all seven programs also includes Social Sciences courses. We believe that our engineering programs provide the necessary depth and broad systems-centric educational experience for long-term success in the emerging cutting-edge industries in the field of IT and engineering.

The curriculum of the first semester is common to all the seven programs allowing eligible students to move from one program to the other. The first two years' curriculum comprises mostly of core courses for the disciplines. Unlike a conventional engineering institute where students study science courses such as physics, chemistry, etc. in the first year, IIIT-Delhi students study courses related to programming, hardware, mathematics, as well as communication skills, etc. However, we do provide flexibility to the students to study science courses through electives. This allows students to study these science courses according to their interests and aspirations.

For more information on the programs and courses within the programs, please visit the website **<https://www.iiitd.ac.in/academics/btech>**.
