

# Student Affairs Highlight

MARCH 2022 EDITION

# YourDost

According to the WHO, 1 in every 4 Indians is going through stress. The student community, in particular, is seeing an increase in stress levels in recent times. In the midst of all this, it's important to remember that some people are great athletes, while others are awkward. Some people are gifted bakers, while others tend to burn everything they touch in the kitchen. No one person has it all together.

We are happy to announce that in addition to our existing Well-being Cell's counselling services we are starting the online counselling services in collaboration with Your Dost.

None of the sessions you take on the platform are shared with anyone, including the institution. With this, we also want to reaffirm the fact that apart from your academic and professional success, we at IIT Delhi also care tremendously about your complete well being.
