IIIT Delhi is inviting applications for the position of **"Software Enterprise Architect - Product Strategy Unit"**. The Product Strategy Unit for Inclusive Public Technology is an initiative aimed at bringing industry and academic experts together and enabling the creation of digital public goods, bodies of knowledge, and implementation processes to help make public digital systems more inclusive and expand the reach of public service delivery.

This role offers the opportunity to impact public infrastructure and services through innovative digital solutions significantly. The ideal candidate will be passionate about technology for social good and able to navigate complex stakeholder environments while driving product success. In this role, you will be working closely with various government departments and provide support to develop highly scalable, secure, user friendly and robust technology products

The key responsibilities include but are not limited to

- Support government departments to develop and maintain the enterprise architecture strategy, and roadmap
- Collaborate with key stakeholders to understand business needs and translate them into technical solutions
- Ensure the organisation's technology architecture aligns with industry standards and IT best practices
- Ensure that products are secure, scalable, and efficient enterprise-level solutions
- Evaluate emerging technologies and make recommendations for their use
- Develop and maintain technical standards, and policies
- Provide guidance to development teams on technology architecture best practices
- Ensure that proposed solutions align with business continuity and disaster recovery plans
- Work with vendors and third-party providers to ensure solutions meet specific organisational needs

Qualifications:

- Bachelor's degree in computer science, information technology or a related field
- Minimum of 15 years of experience in technology architecture, including at least five years exclusively in an enterprise architect role
- Strong understanding of popular enterprise architecture frameworks
- Experience with cloud computing, micro services architecture and containerisation
- Experience with enterprise-level integration technologies such as ESBs and API gateways
- Strong understanding of IT security best practices and experience designing, and implementing secure solutions
- Experience with agile development methodologies and sound DevOps practices
- Excellent communication and interpersonal skills
- Ability to work effectively in a team environment
- Strong analytical and problem-solving skills
- Prior experience in a consulting or advisory role, with a focus on technology development and rollout in the development sector, preferably with government, is desirable

Salary and Duration

The salary will be in the range of **55-70 lakhs** per year based on the candidate's qualification and experience. The candidate chosen for this role will be based in Delhi-NCR

The duration of the job will be equal to the duration of the project and co-terminus with the project. Currently the duration is till July 2026.

How to apply

Please send your C.V. to **chcc@iiitd.ac.in**. Please also send a cover letter indicating how you are fit for the job and if offered, how soon you will be able to join.The last date for application is **30/5/2025,** however, applications will be processed and received and people will be asked to join as soon as possible.
