

IIIT-Delhi LAUNCHES NEW MASTER OF TECHNOLOGY (RESEARCH) PROGRAM IN COMPUTER SCIENCE AND ENGINEERING

March 21, 2023 - The Department of Computer Science and Engineering (CSE) at IIIT-Delhi is proud to announce the launch of its new Master of Technology (Research) program in CSE. The 2-year program is designed to nurture students at the pre-doctorate level for solving complex research problems in computer science and engineering relevant for industry and society.

At the end of the program, the students are expected to have a comprehensive in-depth understanding of a foundational topic of today's cutting-edge computing technology. They will be able to apply existing algorithms, models, and techniques to solve research problems efficiently. They will also be able to design, develop, and evaluate new systems for novel applications that meet the desired needs of industry and society. In addition to developing their technical skills, students will also learn professional and ethical responsibility. They will be able to communicate effectively with a wide range of audience and will be able to work effectively both individually and as part of a team.

USPs of the program

- A degree at par with the globally coveted M.S./M.Tech. by research programs in terms of quality and recognition.
- Potential for quality employability & placements in the growing academic and industrial CS&E research sector.
- The program comes with a lower fee, higher scholarship, incentives at par with Ph.D. students, and a path to continuing a valued Ph.D. program.
 - Substantially lower fees in the first year of the program than that of the regular M.Tech. (CSE) program at IIIT-Delhi.
 - No fees in the second year of the program.
 - A high scholarship of Rs. 21,000 p.m. to cover almost all expenses during the program.
 - Travel support at par with Ph.D. students in the institute.
 - Support of Up to Rs. 50,000 for purchasing a laptop and additional contingency of up to Rs. 10,000 per annum.
 - A student of this program will be eligible to convert to a full-time Ph.D. program (typically after one year) with a full tuition fee refund.
 - A graduate student of the program will be eligible to pursue the sponsored Ph.D. degree from the institute with full tuition fee waiver.

The program is open to students with a B.E./B.Tech. in CSE/IT/ECE/EE, or an M.C.A., or an M.Sc. in Mathematics/Statistics with a valid GATE score. For more information on the program, eligibility, and the application process, visit the IIIT-Delhi website at <https://iiitd.ac.in/admission/mtech/2023>.
