IIIT-Delhi signs MoU with Poland-based IDEAS NCBR for collaborations in AI and digital economy research

New Delhi, 4th December 2023: Catapulting its endeavour to develop academic and research cooperation in the field of artificial intelligence and digital economy, Indraprastha Institute of Information Technology Delhi (IIIT-Delhi), signed a Memorandum of Understanding (MoU) with IDEAS NCBR, Poland.

This partnership will enable IIIT-Delhi to further excel in areas that are not restricted to joint research activities, exchange of doctoral students and researchers, exchange of staff, joint education at the doctoral level, organisation and participation in seminars, symposia, short-term academic programmes and academic meetings. Also, the development of joint projects is to be presented before the European Commission and other institutions of repute to acquire adequate funds for joint research activities.

Prof. Ranjan Bose, Director of IIIT-Delhi, expressed his enthusiasm about the newly-forged collaboration with IDEAS NCBR, stating, *"This strategic partnership with IDEAS NCBR represents a significant step forward in our commitment to advancing knowledge and innovation in artificial intelligence and the digital economy. By joining forces, IIIT-Delhi and IDEAS NCBR aim to create a synergistic environment for academic and research endeavours that will benefit both institutions and contribute to global advancements in these critical domains. Through this MoU, we aspire to foster a collaborative spirit, enabling the exchange of ideas and expertise to shape the future of AI research and its practical applications."*

Professor Piotr Sankowski, President, IDEAS NCBR, said, *"A new chapter in academic and research collaboration in the field of artificial intelligence is marked by the Memorandum of Understanding (MoU) between IIIT-Delhi, India, and IDEAS NCBR, Poland. In this rapidly*

evolving sector, our shared goals are to expand knowledge, encourage creativity, and equip the upcoming generation of world leaders with a robust and scalable infrastructure. This MoU lays the groundwork for a cooperative journey towards technological excellence and societal impact by reflecting our common commitment to developing cutting-edge research and fostering intellectual exchange.”

IDEAS NCBR sp. z o. o. is a research and development center operating in the field of artificial intelligence, whose mission is to support the development of these technologies in Poland by creating a platform connecting the academic and business communities.

Their goal is to build the largest platform in Poland facilitating innovative research, as well as educating a new generation of scientists focused on the practical application of developed algorithms and their subsequent commercialization in industry, finance, medicine and other branches of the economy.
